a) Quota share reinsurance: Reinsurer and writer share all premiums and losses according to a fixed percentage.
eg. Bajaj Allianz enters into a reinsurance contract with Munich Re with retained proportion of 80%. meaning Bajaj Allianz pays 80% of the claim and gets to keep 80% of the premiums received & Munich Re has to pay 20% of the claim and gets to keep 20% of premium recd.

(ii) Non-Proportional: under this arrangement, the direct writer pays a fixed premium to the reinsurer. The reinsurer will only be required to make payments where part of the claim amount falls in a particular insurance layer.

a) Individual excess loss: reinsurer makes a payment when the claim amount for an individual claim exceeds a specified excess point or retention.

Eg. Apollo enters into a reinsurance layer is fixed at 50 lac to 1 crore.

b) Stop loss reinsurance: The reinsurer is liable for the insured's losses incurred over a certain period that exceed a specified amt. or % of some business measure, such as earned premiums written, upto the policy limit. In this, the insurance company agrees to carry the full burden of loss up to a limit and claim amt. exceeding the limit is paid by the reinsurer.
