- (ii) Avoid Moral & Morale Hazard.

(e) Types of Underwriting.

- (i) Medical
- (ii) Financial

(*) Explain why the rates of Insurance are fair, adequate & not excessive.

Solⁿ

- To avoid the financial Problem & Insolvency, the rates must be adequate and fair.
- Rates should not be excessive in relation to the benefits given.
- Rate adequate means, for the given blocks of policies, total payment collected now & in future by the Insure + Invested to subside the expenses.
- Thus there should be establishment of ceiling of the rates.

⑪ What is meant by Actuarial Valuation?

Solⁿ → The process by which the value of all the existing policies is ascertained is called valuation.

→ Since the valuation of Insurance is done by 'Actuary' by applying actuarial principle is termed as actuarial valuation.

⑫ Why is it necessary for a life Insurance company to conduct an actuarial valuation?

Solⁿ → At the end of a year's business the Insurance company determine the surplus carried on from the previous year.

→ The amount set aside for distribution is divided to policy owner & called Divisible Surplus.

→ Once the divisible surplus is decided it is no more a surplus but a liability for Insurer.

→ There are certain basic norms that an Insurance Company has to abide with, are as follows:

- (i) Equity
- (ii) Flexibility
- (iii) Simplicity
- (iv) Consistency.

⑤ What are the various premium payment plans? explain the various premium payment plans in the market life Insurance policies.

Solⁿ

→ Unit-linked plans are essentially similar to mutual fund plans wherein the premium is invested in various funds.

→ Insurance companies charge anywhere 20-35% up to charge their unit-linked plans.

⑥ What is the difference between the traditional cash value Insurance & universal life Insurance?

Solⁿ → Conceptually, all life insurance policy cash value can be derived in the same way.

→ As a practical matter, policies are valued with different point of view.

→ In the traditional form of life Insurance, the savings element is considered by periodic payment. Under this, premium is not divided into risk & saving element.

In Universal life Insurance, the saving element is often considered as more independent part of the policy.

Under this, premium is divisible in risk & Savings.

Under the key element of product pricing are open to the policy owner, the higher the premium the higher will be cash values.

diagnosed with blood condition, it was not disclosed in insurance application. However, he signed the application with the report reported by nurse, confirming all the facts are true when Mr. Harvey died several months later. Harvey claims benefit under the policy. The insurance company denied the claim for failing to disclose information about Mr. Harvey's health.

- Do you think insurance company is right? whose fault is this?
- Option available to Mrs. Harvey
- What are reasons for denying claim.
- What is underwriting? why it is done?
- List the types of underwriting.

Solⁿ

- Insurance company is correct in denying claim as he has signed the contract of mistake although he knew mistake. It is a case of disclosure.
- Mrs. Harvey can complain against the Insurance company.
- Reason for denying claim:
 - Avoiding Medical Test
 - (i) Non-disclosure or Wrong disclosure
 - (ii) Operation of condition clause
 - (iv) Fraud.

⑮ Distinguish between surplus & Profit in life Insurance.

Solⁿ

— In life Insurance the word 'surplus' signifies an estimated profit. This is because the calculation of profit is the excess over the cost price of the product.

— Thus, in regular business, the difference b/w the cost price & selling price decide the profit made or loss incurred.

— Profit in the Insurance Company is the result of margin kept on the basis adopted for the calculation of the premium with regard to mortality & other factors.

→ When the actual experience is better than the projected, the profit achieved is not only due to margin kept during valuation of premium but is also the profit arising.

— Furthermore the excess of assets that remain after settling current liabilities can't be termed as 'profit' as it will be required to meet the liabilities in future.

→ After this the funds left with the company can be considered as profit.

— The distribution of it is called surplus.

Assignment 2

Name: Hel Shah

Roll no: 66

Subject: Life Insurance - Principle, product and practices

A life Insurance Company has recently got approved for many products from IRDAI. List various distribution channel that can be used to sell the product in the market.
