University of Mumbai

Bridging the Gap Between Education and Career

Turnover from the derivatives segment in India reached Rs 3,453.9 lakh crore in FY20

India is expected to be the fourth largest private wealth market globally by 2028

In 2019, FPI investment in Indian equities touched a five-year high of Rs 101,122 crore

Total value of private equity (PE) investment grew 44 percent over past 3 years

M.Sc. in Actuarial Science and Quantitative Finance

The programme is designed for fresh graduates and working professionals who wish to advance their career in the Financial domain, by building specialized skills in the areas such as **Blockchain, InsurTech, Machine Learning & Predictive Learning for Finance, Quantitative Methods, and Financial Analytics.**

This degree program focuses on the use of actuarial skill-set in the world of finance to make well researched financial products and help using mathematical formulas for real-life, complex datasets to analyze financial markets and securities for decision-making purposes. Actuarial skill-set is to have a strong technical ability and a great foundation in math and statistics. They also have coding skills which help to analyze data in an efficient manner and automate recurring tasks when necessary.

The students are also eligible to pursue PhD after gaining their Master's degree which may be difficult after an MBA in Finance.

This one of a kind degree aims at providing students various career opportunities like: **Investment Banking, Risk Modelling, Equity Research, Asset - Liability Management and Financial Analysis.**
